Subject: FED - CFM - Supplemental GW Sampling Program

In order to move the project forward and implement the proposed remedy, Frazer-Exton Development, LLC (FED) has agreed to conduct additional ground water sampling and bromate analysis as described below. Environmental Resources Management, Inc. (ERM), on behalf of FED, will implement the work.

· Four Facility monitoring wells (MW-1, MW-6, MW-7, and MW-10) and three residential wells (Res-8F, Res-17, and Res-41) will be sampled.

· Ground water samples will be collected in accordance with the procedures set forth in the November 1995 Remedial Investigation/Feasibility Study (RI/FS) Work Plan's Field Sampling Plan and Health and Safety Plan. Each ground water sample will be analyzed for bromate using Method 317 by Novachem Laboratories (Novachem) in Oxford, Ohio. Sample containers will be provided by Novachem.

ERM anticipates ground water sampling will be initiated within approximately one week of your approval of this scope, tentatively scheduling sampling to be initiated on 18 February 2002. As discussed in our meeting on 31 January 2002, ERM will coordinate with PSWC so that they can split the samples. We anticipate the draft results will be provided to you within three to four weeks of sample collection. Should USEPA have any questions or concerns regarding the scope outlined herein, please contact me.

Sincerely,

Andrew Thalheimer
